Index of Feature Material

MATERIALS & METHODS

Volume 29

January—June 1949, Inclusive

Feature editorial matter from Volume 29 of MATERIALS & METHODS covering issues from January through June 1949 is indexed here. Material covered in the index includes feature articles, MATERIALS & METHODS Manuals, and Engineering File Facts.

Acrylic Plastic Sheets, Three Dimensional Forming of—Mar., p. 57

Aluminum and Its Alloys:
- Aluminum Alloy, 75S (File Facts)—June, pp. 83, 85
- Aluminum Casting Alloys, Comparison of Common (File Facts)—Feb., pp. 85, 87
- Aluminum Extruding Alloy Used for Tubing and Architectural Applications, New—May, p. 59
- Bright Nickel Plating Provides Low Cost Quality Finish—May, p. 52
- Coloring of Metals (MATERIALS & METHODS Manual)—June, p. 67
- Forgings—Ferrous and Nonferrous (MATERIALS & METHODS Manual)—Mar., p. 71
- Gas-Shielded Arc Welding, Joining Heavy Aluminum Sections Simplified by—Feb., p. 65
- Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
- Materials Supplies and Prices, Outlook in 1949—Jan., p. 49
- Measurement of Close Tolerance Parts (File Facts)—Apr., pp. 79, 81
- Poke Welding Offers New Method of Joining Stainless, Aluminum and Mild Steel—Mar., p. 64
- Precision Casting Process Provides Better Finish, Closer Tolerances, New—Mar., p. 52
- Secondary Metals Now Accepted as of High Quality—Jan., p. 56

Aluminum Casting Alloys, Comparison of Common (File Facts)—Feb., pp. 85, 87

Aluminum Extruding Alloy Used for Tubing and Architectural Applications, New—May, p. 59

Base Metal Selection Important to Successful Porcelain Enameling—Feb., p. 62

Brazing (See Welding):

Bright Nickel Plating Provides Low Cost Quality Finish—May, p. 52

Casting and Castings:
- Aluminum Casting Alloys, Comparison of Common (File Facts)—Feb., pp. 85, 87
- Cast Iron Parts, Induction Hardening Increases Wear Life of—Feb., p. 48
- Corrosion Resistance of Stainless, Monel and Nickel Castings (File Facts)—May, pp. 79, 81
- Gray Iron Castings (MATERIALS & METHODS Manual)—Apr., p. 71
- Magnesium Die Castings Offer Weight Saving and Low Cost Advantages—Apr., p. 43
- Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
- Materials Shortages and Rising Labor Costs Force Changes in Manufacturing Techniques—Jan., p. 60
- Nodular Graphite Cast Iron as an Engineering Material—Apr., p. 45
- Precision Casting Process Provides Better Finish, Closer Tolerances, New—Mar., p. 52

Cast Iron Parts, Induction Hardening Increases Wear Life of—Feb., p. 48

Cast Irons:
- Base Metal Selection Important to Successful Porcelain Enameling—Feb., p. 62
- Cast Iron Parts, Induction Hardening Increases Wear Life of—Feb., p. 48
- Gray Iron Castings (MATERIALS & METHODS Manual)—Apr., p. 71
- Hardening Enhances Properties of Malleable Iron—June, p. 56
- Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
- Nodular Graphite Cast Iron as an Engineering Material—Apr., p. 45
- Vanadium Alloyed Irons (File Facts)—Apr., p. 83

Cemented Carbides (MATERIALS & METHODS Manual)—Feb., p. 73

Cleaners for Various Metals, Methods and Types of (File Facts)—Jan., pp. 89, 91

Coatings and Finishes:
- Base Metal Selection Important to Successful Porcelain Enameling—Feb., p. 62
- Bright Nickel Plating Provides Low Cost Quality Finish—May, p. 52
- Coloring of Metals (MATERIALS & METHODS Manual)—June, p. 67
- Liquid Blasting Cleans and Finishes Metallic and Nonmetallic Surfaces—Apr., p. 64
- Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
- Non-Slip Materials Find Wide Use in Industry—June, p. 59
- Oxide Film on Steel Provides Electrical Insulation, Special—Apr., p. 54
- Solder Flow on Steel and Brass, Metal Coatings Improve—May, p. 60
- Steam Atmosphere Used to Heat Treat and Improve Surface Properties—May, p. 56

Coloring of Metals (MATERIALS & METHODS Manual)—June, p. 67

Compressed Wood-Fiber Sheets Useful as Engineering Materials—Feb., p. 54

Copper, Brass and Bronze:
- Bright Nickel Plating Provides Low Cost Quality Finish—May, p. 52
- Coloring of Metals (MATERIALS & METHODS Manual)—June, p. 67
- Forgings—Ferrous and Nonferrous (MATERIALS & METHODS Manual)—Mar., p. 71
- Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
- Materials Supplies and Prices, Outlook in 1949 Unsettled for—Jan., p. 49
- Measurement of Close Tolerance Parts (File Facts)—Apr., pp. 79, 81
- Secondary Metals Now Accepted as of High Quality—Jan., p. 56
- Solder Flow on Steel and Brass, Metal Coatings Improve—May, p. 60

Corrosion Resistance of Stainless, Monel and Nickel Castings (File Facts)—May, pp. 79, 81

Electric Furnace Brazing, Redesigning Metal Parts for—Apr., p. 58

Engineering File Facts:
- Aluminum Alloy, 75S—June, pp. 83, 85
- Aluminum Casting Alloys, Comparison of Common—Feb., pp. 85, 87
- Carburizing Processes, Comparison of Commercial—Mar., pp. 85, 87
- Cleaners for Various Metals, Methods and Types of—Jan., pp. 89, 91
- Corrosion Resistance of Stainless, Monel and Nickel Castings—May, pp. 79, 81
- Measurement of Close Tolerance Parts—Apr., pp. 79, 81
- Molded Hard Rubber Parts—May, p. 83
- Vanadium Alloyed Irons—Apr., p. 83

Fabricated Parts:
- Electric Furnace Brazing, Redesigning Metal Parts for—Apr., p. 58
- Forgings—Ferrous and Nonferrous (MATERIALS & METHODS Manual)—Mar., p. 71
- Heavy-Duty Weldments, Several Steel Forms Combined in—May, p. 49
- Is It Cheaper to Buy or Make Parts?—Jan., p. 54
- Magnesium Die Castings Offer Weight Saving and Low Cost Advantages—Apr., p. 43
- Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
- Materials Problems Solved to Develop New Butyl-Molding Transformer—June, p. 47
- Materials Shortages and Rising Labor Costs Force Changes in Manufacturing Techniques—Jan., p. 60
- Molded Hard Rubber Parts (File Facts)—May, p. 83
- Radiant Heating and Automatic Hydraulic Bending Combined to Form Steel Links—Mar., p. 61
- Shrink Fitting, Assembling Metal Parts by—May, p. 64
- Flame Hardening Steps Up Production of Steel Cams, Automatic—Apr., p. 47
- Forging Alloys for High Temperature Service—Apr., p. 50

Forging and Forming:
- Acrylic Plastic Sheets, Three Dimensional Forming of—Mar., p. 57
- Forging Alloys for High Temperature Service—Apr., p. 50
- Forgings—Ferrous and Nonferrous (MATERIALS & METHODS Manual)—Mar., p. 71
- Induction Annealing of Light Steel Stampings Increases Production, Cuts Cost—June, p. 51
- Magnetic Properties of Steels, How to Reduce Adverse Effects of Fabricating on—Mar., p. 49
- Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
- Materials Shortages and Rising Labor Costs Force Changes in Manufacturing Techniques—Jan., p. 60
- Radiant Heating and Automatic Hydraulic Bending Combined to Form Steel Links—Mar., p. 61

Forgings—Ferrous and Nonferrous (MATERIALS & METHODS Manual)—Mar., p. 71

Gas-Shielded Arc Welding, Joining Heavy Aluminum Sections Simplified by—Feb., p. 65

Gray Iron Castings (MATERIALS & METHODS Manual)—Apr., p. 71

H-Steels, Are They Being Accepted?—Jan., p. 67

Hardening Enhances Properties of Malleable Iron—June, p. 56

Heating and Heat Treatment:
- Carburizing Processes, Comparison of Commercial (File Facts)—Mar., pp. 85, 87
- Cast Iron Parts, Induction Hardening Increases Wear Life of—Feb., p. 48
- Flame Hardening Steps Up Production of Steel Cams, Automatic—Apr., p. 47
- Hardening Enhances Properties of Malleable Iron—June, p. 56
- Induction Annealing of Light Steel Stampings Increases Production, Cuts Cost—June, p. 51
- Magnetic Properties of Steels, How to Reduce Adverse Effects of Fabricating on—Mar., p. 49
- Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
- Radiant Heating and Automatic Hydraulic Bending Combined to Form Steel Links—Mar., p. 61
- Steam Atmosphere Used to Heat Treat and Improve Surface Properties—May, p. 56
- Tools and Dies Bright Hardened and Brazed in New One-Step Process—Feb., p. 58

Heavy-Duty Weldments, Several Steel Forms Combined in—May, p. 49

Induction Annealing of Light Steel Stampings Increases Production, Cuts Cost—June, p. 51

Is It Cheaper to Buy or Make Parts?—Jan., p. 54

Liquid Blasting Cleans and Finishes Metallic and Nonmetallic Surfaces—Apr., p. 64

Magnesium:
- Coloring of Metals (MATERIALS & METHODS Manual)—June, p. 67
- Forgings—Ferrous and Nonferrous (MATERIALS & METHODS Manual)—Mar., p. 71
- Magnesium Die Castings Offer Weight Saving and Low Cost Advantages—Apr., p. 43
- Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
- Materials Supplies and Prices, Outlook in 1949 Unsettled for—Jan., p. 49

Magnesium Die Castings Offer Weight Saving and Low Cost Advantages—Apr., p. 43

Magnetic Properties of Steels, How to Reduce Adverse Effects of Fabricating on—Mar., p. 49

Manual Submerged Arc Process Simplifies Welding for Many Uses—June, p. 64

Manuals, MATERIALS & METHODS:

Cemented Carbides—Feb., p. 73

Coloring of Metals—June, p. 67
Forgings—Ferrous and Nonferrous—Mar., p. 71
Gray Iron Castings—Apr., p. 71
Materials Engineering Developments in 1948, Review of—Jan., p. 77
Thermosetting Plastics—May, p. 71
Materials, Design and Processing, Needed—More Coordination Between—Jan., p. 70
Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
MATERIALS & METHODS Article Awarded First Prize in IFMA Competition—Feb., p. 53
Materials Problems Solved to Develop New Butyl-Molding Transformer—June, p. 47
Materials Shortages and Rising Labor Costs Force Changes in Manufacturing Techniques—Jan., p. 60
Materials Supplies and Prices, Outlook in 1949 Unsettled for—Jan., p. 49
Measurement of Close Tolerance Parts (File Facts)—Apr., pp. 79, 81
Misconceptions About Plastics Being Overcome Through Intelligent Application—Jan., p. 64
Molded Hard Rubber Parts (File Facts)—May, p. 83

Nickel and Its Alloys:
Bright Nickel Plating Provides Low Cost Quality Finish—May, p. 52
Corrosion Resistance of Stainless, Monel and Nickel Castings (File Facts)—May, pp. 79, 81
Forging Alloys for High Temperature Service—Apr., p. 50
Forgings—Ferrous and Nonferrous (MATERIALS & METHODS Manual)—Mar., p. 71
Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
Materials Supplies and Prices, Outlook in 1949 Unsettled for—Jan., p. 49
Secondary Metals Now Accepted as of High Quality—Jan., p. 56
Nodular Graphite Cast Iron as an Engineering Material—Apr., p. 45

Nonferrous Metals:
Bright Nickel Plating Provides Low Cost Quality Finish—May, p. 52
Cemented Carbides (MATERIALS & METHODS Manual)—Feb., p. 73
Forging Alloys for High Temperature Service—Apr., p. 50
Forgings—Ferrous and Nonferrous (MATERIALS & METHODS Manual)—Mar., p. 71
Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
Materials Supplies and Prices, Outlook in 1949 Unsettled for—Jan., p. 49
Secondary Metals Now Accepted as of High Quality—Jan., p. 56
Steam Atmosphere Used to Heat Treat and Improve Surface Properties—May, p. 56
Titanium, Progress Told at Naval Research Symposium—Feb., p. 45

Nonmetallic Materials (other than plastics):
Compressed Wood-Fiber Sheets Useful as Engineering Materials—Feb., p. 54
Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
Molded Hard Rubber Parts (File Facts)—May, p. 83
Nonmetallic Materials Developed with Improved Magnetic Properties—June, p. 54
Non-Slip Materials Find Wide Use in Industry—June, p. 59
Thermal Insulating Material Combines Light Weight and High Strength, New—Apr., p. 63
Nonmetallic Materials Developed with Improved Magnetic Properties—June, p. 54
Non-Slip Materials Find Wide Use in Industry—June, p. 59
Oxide Film on Steel Provides Electrical Insulation, Special—Apr., p. 54

Plastics:
Acrylic Plastic Sheets, Three Dimensional Forming of—Mar., p. 57
Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
Materials Problems Solved to Develop New Butyl-Molding Transformer—June, p. 47
Misconceptions About Plastics Being Overcome Through Intelligent Application—Jan., p. 64
Molded Hard Rubber Parts (File Facts)—May, p. 83
Non-Slip Materials Find Wide Use in Industry—June, p. 59
Thermosetting Plastics (MATERIALS & METHODS Manual)—May, p. 71
Poke Welding Offers New Method of Joining Stainless, Aluminum and Mild Steel—Mar., p. 64

Powder Metallurgy:
Cemented Carbides (MATERIALS & METHODS Manual)—Feb., p. 73
Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
Materials Shortages and Rising Labor Costs Force Changes in Manufacturing Techniques—Jan., p. 60
Powder Metallurgy, Where Does It Stand Today?—Mar., p. 45
Precision Casting Process Provides Better Finish, Closer Tolerances, New—Mar., p. 52
Radiant Heating and Automatic Hydraulic Bending Combined to Form Steel Links—Mar., p. 61
Secondary Metals Now Accepted as of High Quality—Jan., p. 56
Self-Heating Tape Simplifies Soldering Operations, New—Apr., p. 57
Shrink Fitting, Assembling Metal Parts by—May, p. 64
Solder Flow on Steel and Brass, Metal Coatings Improve—May, p. 60
Steam Atmosphere Used to Heat Treat and Improve Surface Properties—May, p. 56

Steel:
Base Metal Selection Important to Successful Porcelain Enameling—Feb., p. 62
Carburizing Processes, Comparison of Commercial (File Facts)—Mar., pp. 85, 87
Coloring of Metals (MATERIALS & METHODS Manual)—June, p. 67
Corrosion Resistance of Stainless, Monel and Nickel Castings (File Facts)—May, pp. 79, 81
Flame Hardening Steps Up Production of Steel Cams, Automatic—Apr., p. 47
Forging Alloys for High Temperature Service—Apr., p. 50
Forgings—Ferrous and Nonferrous (MATERIALS & METHODS Manual)—Mar., p. 71
H-Steels, Are They Being Accepted?—Jan., p. 67
Heavy-Duty Weldments, Several Steel Forms Combined in—May, p. 49
Induction Annealing of Light Steel Stampings Increases Production, Cuts Cost—June, p. 51
Magnetic Properties of Steels, How to Reduce Adverse Effects of Fabricating on—Mar., p. 49
Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
Materials Supplies and Prices, Outlook in 1949 Unsettled for—Jan., p. 49
Measurement of Close Tolerance Parts (File Facts)—Apr., pp. 79, 81
Non-Slip Materials Find Wide Use in Industry—June, p. 59
Oxide Film on Steel Provides Electrical Insulation, Special—Apr., p. 54
Poke Welding Offers New Method of Joining Stainless, Aluminum and Mild Steel—Mar., p. 64
Precision Casting Process Provides Better Finish, Closer Tolerances, New—Mar., p. 52
Radiant Heating and Automatic Hydraulic Bending Combined to Form Steel Links—Mar., p. 61
Secondary Metals Now Accepted as of High Quality—Jan., p. 56
Solder Flow on Steel and Brass, Metal Coatings Improve—May, p. 60
Steam Atmosphere Used to Heat Treat and Improve Surface Properties—May, p. 56
Studwelding—A Versatile Metal Fastening Process—Feb., p. 66

Testing and Inspection:
Measurement of Close Tolerance Parts (File Facts)—Apr., pp. 79, 81
Thermal Insulating Material Combines Light Weight and High Strength, New—Apr., p. 63
Thermosetting Plastics (MATERIALS & METHODS Manual)—May, p. 71
Titanium, Progress Told at Naval Research Symposium—Feb., p. 45
Tools and Dies Bright Hardened and Brazed in New One-Step Process—Feb., p. 58
Vanadium Alloyed Irons (File Facts)—Apr., p. 83

Welding and Joining:
Electric Furnace Brazing, Redesigning Metal Parts for—Apr., p. 58
Gas-Shielded Arc Welding, Joining Heavy Aluminum Sections Simplified by—Feb., p. 65
Heavy-Duty Weldments, Several Steel Forms Combined in—May, p. 49
Manual Submerged Arc Process Simplifies Welding for Many Uses—June, p. 64
Materials Engineering Developments in 1948, Review of (MATERIALS & METHODS Manual)—Jan., p. 77
Poke Welding Offers New Method of Joining Stainless, Aluminum and Mild Steel—Mar., p. 64
Self-Heating Tape Simplifies Soldering Operations, New—Apr., p. 57
Solder Flow on Steel and Brass, Metal Coatings Improve—May, p. 60
Studwelding—A Versatile Metal Fastening Process—Feb. p. 66
Tools and Dies Bright Hardened and Brazed in New One-Step Process—Feb., p. 58

Zinc:
Bright Nickel Plating Provides Low Cost Quality Finish—May, p. 52
Coloring of Metals (MATERIALS & METHODS Manual)—June, p. 67
Materials Supplies and Prices, Outlook in 1949 Unsettled for—Jan., p. 49
Secondary Metals Now Accepted as of High Quality—Jan., p. 56

Authors' Index

Bagger, N. B.
Coloring of Metals (MATERIALS & METHODS Manual)—June, p. 67
Forgings—Ferrous and Nonferrous (MATERIALS & METHODS Manual)—Mar., p. 71
Outlook in 1949 Unsettled for Materials Supplies and Prices—Jan., p. 49
Bleiweis, Jerome L., Bright Nickel Plating Provides Low Cost Quality Finish—May, p. 52
Burpo, Robert S., Jr.
Comparison of Commercial Carburizing Processes (File Facts)—Mar., pp. 85, 87
Comparison of Common Aluminum Casting Alloys (File Facts)—Feb., pp. 85, 87
Cady, Edwin Laird, Compressed Wood-Fiber Sheets Useful as Engineering Materials—Feb., p. 54
Chase, Herbert
Automatic Flame Hardening Steps Up Production of Steel Cams—Apr., p. 47
Materials Shortages and Rising Labor Costs Force Changes in Manufacturing Techniques—Jan., p. 60
Chase, Herbert & Schakenbach, Leslie T., New Precision Casting Process Provides Better Finish, Closer Tolerances—Mar., p. 52
Clauser, H. R.
Induction Annealing of Light Steel Stampings Increases Production, Cuts Cost—June, p. 51
Induction Hardening Increases Wear Life of Cast Iron Parts—Feb., p. 48
Needed—More Coordination Between Materials, Design and Processing—Jan., p. 70
Powder Metallurgy, Where Does It Stand Today?—Mar., p. 45
Cornell, R. C., Magnesium Die Castings Offer Weight Saving and Low Cost Advantages—Apr., p. 43
Damon, Samuel & Pranses, A. L., Tools and Dies Bright Hardened and Brazed in New One-Step Process—Feb., p. 58
Deschars, C., Assembling Metal Parts by Shrink Fitting—May, p. 64
Du Mond, T. C.
Gray Iron Castings (MATERIALS & METHODS Manual)—Apr., p. 71
H-Steels, Are They Being Accepted?—Jan., p. 67
Non-Slip Materials Find Wide Use in Industry—June, p. 59
